

Hugh Blowers

1948 to 2026

Hugh died on Sunday 12th July in a hospice in Beccles after a short battle with cancer.

Hugh followed the family tradition by going into teaching and he taught metal work.

Outside of work Hugh and Lynn had an interesting life, racing a full-size hydroplane powered by an engine built by Hugh, then onto dinghy sailing at home and abroad.

Next followed kite flying. Then came tethered hydroplanes closely followed by tethered cars. During this period came the birth of "On The Wire" a much loved and looked forward to online publication every month, full of history and information.

Hugh loved all things mechanical and running cars brought him in contact with many likeminded people. That was the thing that both Hugh and Lynn enjoyed so much - the openness and sharing that is the tether car community.

May he rest in peace.
