

We say farewell to Endre Bogdán (1942–2026).

He began his modeling journey in 1954 with airplane models, and from 1958 onward devoted himself to car modeling, remaining active until 2019. During this time, he achieved numerous Hungarian records and earned 45 Hungarian Championship titles, leaving an extraordinary legacy in the sport. In 2019, due to heart disease, he made the difficult decision to retire from active modeling. Nevertheless, he continued to follow competitions with great interest, staying connected to the community he loved.

Endre Bogdán passed away on January 16, 2026.

His dedication, passion, and memory will remain with us forever.
